

FUEL STRAINER

07056-18425

Fuel strainers are used to remove unwanted solid particles from fuel oil, in order to ensure that the engine receives a clean supply of fuel.

KMP Far East carries two versions of the Fuel Strainer 07056-18425 – the **Metal-mesh** and the **Nylon-mesh** versions. We began with the Metal Version, and only added the Nylon Version to our range at a later time. Both versions have been sold in large quantities and have received positive user feedback.

Metal version

- Mesh and shell are made of metal
- **Extra durability** and long working life
- Excellent cost-effectiveness and feedback among users

Nylon version

- Mesh and shell are both made of nylon / plastic
- Comes with guide and float
- More common in market due to lower cost

Fuel Tank Cap

KMP Far East also carries the associated **Fuel Tank Cap 20Y-04-11160**, as well as a wide range of high-quality fuel tank and radiator caps
