

TURBOCHARGERS

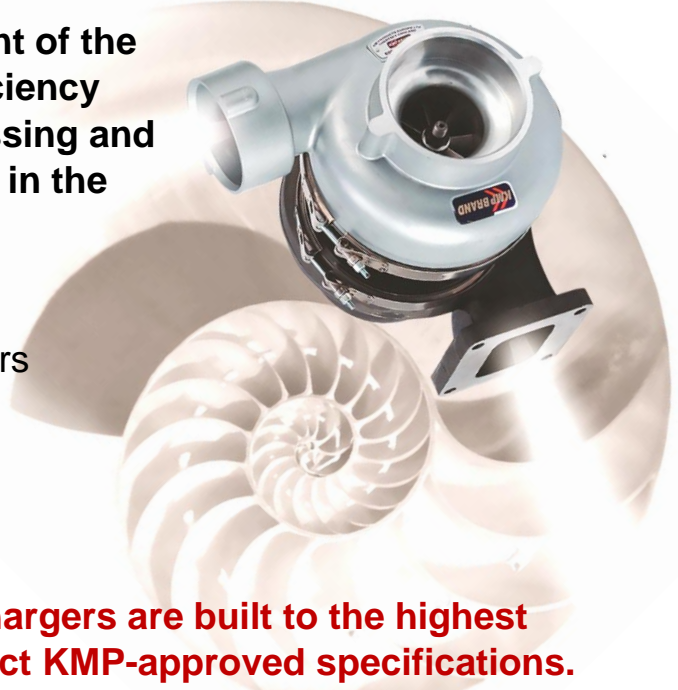

ASSEMBLIES, CARTRIDGES & REPAIR KITS

PREMIUM QUALITY REPLACEMENT ENGINE PARTS

Suitable for: Komatsu®, Caterpillar®, Cummins® & Perkins® applications.

The turbocharger is an essential component of the modern diesel engine; it increases the efficiency and power output of an engine by compressing and thereby increasing the density of intake air in the combustion chamber.

Due to the extremely high temperatures and rotational speeds, it is **critical** for turbochargers to be assembled using only premium-quality components and in accordance to precise standards.

KMP Brand® turbochargers are built to the highest standards and to exact KMP-approved specifications.

Our turbos are backed by professional third-party specialists in the United Kingdom.

If installed & operated properly, and with regular engine maintenance, a KMP turbocharger will give high performance and a long lifespan.

Today, KMP Brand® turbochargers are used to power diesel engines across a wide range of industries and applications, all over the world.

KMPFE has in stock a wide & comprehensive range of turbochargers, cartridges/cores & repair kits. Refer to our KMP Turbocharger Catalogue for installation instructions and troubleshooting guide. Contact your sales representative today.
